

About IDEA Games

IDEA Games

Stands for an Independent Developers Association, founded in November 2005 by three large Czech computer game development studios: Bohemia Interactive Studio, Altar Games and Black Element Software. The Association is an open structure that actively seeks new developers to bring their games to the market. IDEA Games saves both time and money for its members, allowing them to focus on the areas they know best - game development.

IDEA Games

Employs game industry veterans from all three founding studios with vast experience in the field of game design and production as well as computer game sales/marketing, publishing and distribution.

IDEA Games

Offers to its members a wide range of services, including legal, sales, marketing and PR services, contract negotiations, business plan creation, representation at industry conventions and fairs.
